Education

- 1979-1983** **New York College of Podiatric Medicine:** four year doctoral program in podiatric medicine, orthopedics and biomechanics, general podiatry, and surgery. Graduated 31st out of 105 students, this included externships to the VA Hospital in Westhaven, CT and to the offices of Dr. Ronald J. Strauss in Wilmington, DE.
- 1973-1979** **State University of New York at Stonybrook, New York.** Completed a Bachelor of Science in Biology with a strong concentration in Mechanical Engineering. (Worked full-time as a mechanical engineer for Sperry Gyroscope from 1977-1979 while completing degree and pre-med requirements.)
- 1969-1973** **Baldwin Senior High School.** General studies. Graduated 6 months early to bicycle across the United States.

Professional Associations

Kent State University College of Podiatric Medicine
Barry University School of Podiatric Medicine
University of Bridgeport, College of Chiropractic – Post Graduate Faculty
Corporate Sponsor – California Podiatric Medical Association (2006-2007)
American Podiatric Medical Association Member
Tennessee Podiatric Medical Association Treasurer (1984-1986)
Academy of Ambulatory Foot Surgery
Diplomat National Board of Podiatry Examiners

Professional Experience

Thirteen years clinical practice in Middle Tennessee. During the first year in practice, to gain additional training, I assisted local podiatrists on 105 surgical cases involving over 550 procedures. In addition, I performed personally over 200 procedures on more than 50 patients that were followed to a successful outcome in my office with the assistance of several local podiatric surgeons.

Accomplishments

- 2015** Released Mass 3D App in the Apple App Store
- 2015** Released LA Angle App in the Apple App Store
- 2015** National Small Business Association –Tennessee – Small Businessman of the Year Award
- 2015** Released – Sole Supports Break in App in Apple Store
- 2014** Patented - *Copley*TM High Heel Orthotics the first true custom High Heel Orthotic
- 2014** Released Mass Relief App in Apple Store
- 2013** Changed Bio foam from flat to 45 degree angle, improving the casting quality with MASS Posture Casting
- 2012** Bicycled the Natchez Trace Parkway to benefit Yucatan Crippled Children's Project
- 2010** Engineered and Developed Optical Calibration for Full Contact Sole Support orthotic devices
- 2010** Continued Research and Data gathering at the Smithsonian Institution in Department of Anthropology on foot bones through the ages.
- 2006** Continued Research and Data gathering at the Smithsonian Institution in Department of Anthropology on foot bones through the ages.
- 2005** Established MASS Posture (Maximal Arch Supination Stabilization) and Gait Reference Casting Technique, as a biomechanical model of correction for foot biomechanics.
- 2005** Bicycled around the circumference of Ireland
- 2002** Conducted Research and Data gathering at the Smithsonian Institution in Department of Anthropology on foot bones through the ages.
- 2001** Engineered and Developed Calibration for Full Contact Sole Support orthotic devices
- 1996** Discovered the locking mechanism of the subtalar joint and function of the talo-cuboid joint. Redefined the application of the neutral rear foot Posture in orthotic casting.
- 1990** Researched and tested materials for orthotic fabrication and developed orthotics that are thinner, semi-flexible, custom designed and manufactured, adjustable and designed for lifetime of wear. Founded Orthometrix, which later became Sole Supports Biomechanical Lab.
- 1988** Researched biomechanical orthotic devices and developed Dynamic Casting; a new casting technique using urethane foam, which reliably captures corrected foot Posture.

1986 Fifth podiatrist nationally to use the Fluoroscan, a real time imaging device. Developed and performed several new techniques which improved several minimal incision procedures previously done without direct visualization.

Description of Lectures:

Foot Biomechanics and Orthotics - MASS Posture Theory” looks at managing foot biomechanics from an engineering perspective. Challenging the standard, industry techniques originated by Root, Orien and Weed in 1977. MASS Posture Theory emphasizes the importance of actually changing the functional posture of the foot in the over-pronator, enabling the healthy levels of supination required for non-pathological gait. For the more rigidly set over-supinator, you will learn about full contact support that disperses plantar pressures evenly, alleviating the “tripod” force concentrations that can be progressively traumatic. MASS Posture Theory is immediately pertinent to all who are involved or interested in biomechanical management of the foot and lower kinetic chain.

Foot Posture Biomechanics - MASS Posture Casting Workshop

- ✚ Understand the reasoning behind using MASS posture as a therapeutic geometry for application of corrective force through an orthotic device and how that geometry is captured, revealing its relationship to an ideal gait cycle
- ✚ Demonstrate MASS Posture Casting explaining the advantages of capturing the foot with maximal supination and evenly distributed soft tissue compression and use of angled Foam
- ✚ Explain the manufacturing of a true 100% custom calibrated foot orthotic. What this means to the Podiatrist and the Patient.
- ✚ Introduction of new and innovative products through research and development.

CRPS, Ehler’s Danlos and Foot Posture

- ✚ Understand criteria to diagnose CRPS
- ✚ Exposure to traditional treatment options
- ✚ Understand the connection between Ligaments and Chronic Pain
- ✚ Early results of Manual Ligament Therapy for Chronic Pain
- ✚ Understand the connection between Ehler’s Danlos and Chronic Pain
- ✚ Understand how collapsed foot posture contributes to Chronic Pain

Posture and Peripheral Neuropathy

- ✚ Understand Michael Graham’s theory of Posture related nerve strain
- ✚ Case Presentation: Reversal of Peripheral Neuropathy with MASS posture
- ✚ Understand the basic concepts of the MASS Theory of postural correction
 - Indications

- MASS Posture and Soft Tissue Compression Casting
- Full Contact, Calibrated Leaf Springs
